

## Abstract

Method and arrangement for optimizing the pulse shape  
of an amplitude-modulated optical signal

5

The influences on transmission quality caused by chirp and self-phase modulation are at least largely corrected by means of an optimally set operating point of the modulator (2). Suitable criteria are obtained in control loops in order to maintain the optimal setting.

Figure 1

1. The first part of the report, "The State of the Union," is a general survey of the country, its resources, and its progress. It is a valuable document for the people, and it is one of the most important of the kind. It is a document which should be read by every citizen, and it is one of the most important of the kind. It is a document which should be read by every citizen, and it is one of the most important of the kind.
